PHY201 Assessment Statement 2022

Course is endorsable

Year : 12

Course : Physics

Mr A Kumar

Total Credits : 22

In Level 2 Physics course students develop a range of practical skills and mathematical analytical skills relevant to Physics. A total of 20 credits is offered in this course which includes two external and three internal standards. Through this course they will develop knowledge and understanding in the main areas of mechanics (motion, force, energy), electricity and magnetism, nuclear physics and waves. Students also investigate an application of Physics ideas to a real context. This course requires students to apply their mathematical skills in solving a wide range of problems which requires a good level of analytical and critical thinking skills.

Pre Requisites

Minimum of 12 Level 1 Science Credits including the Mechanics Achievement Standards offered in either General Science or Advanced Science. Good grades in Mathematics.

Additional Requirements

Student workbook cost \$22
Scientific calculator

No	Standard Number	Version	Level	Credits	Lit / Num	Full Title	Method of Assessment	Assessment Opportunities Offered	Approximate Date	Grade	Teacher Signature
1	91168	2	2	4	Num L1 Lit	Physics 2.1 - Carry out a practical physics investigation that leads to a non-linear mathematical relationship	Practical	1	Week 2 Term 3		
2	91172	2	2	3	L1 Lit	Physics 2.5 - Demonstrate understanding of atomic and nuclear physics	Test	1	Week 8 Term 1		
3	91169	2	2	3	L1 Lit	Physics 2.2 - Demonstrate understanding of physics relevant to a selected context	Written report	1	Week 8 Term 2		
4	91171	2	2	6	Num L1 Lit	Physics 2.4 - Demonstrate understanding of mechanics	Exam	Ext'dmal	TERM 4		
5	91173	2	2	6	Num L1 Lit	Physics 2.6 - Demonstrate understanding of electricity and electromagnetism	Exam	Ext'dmal	TERM 4		

School Assessment Procedures - You can view your rights and obligations in the school's assessment procedures in the **Student Assessment Handbook**

Record your internal grades and ask your teacher to sign it off as correct. You can then use this as evidence of your achievement.

2022 COURSE OUTLINE YEAR 12 PHYSICS (PHY201)

Subject: Physics

NCEA Level: Two

Entry Requirements: a minimum of 12 credits from NCEA Level One Science and Mathematics

Number of credits gained: 22

Method of assessment:

- Both internal and external assessment
- Internal assessments are given after a series of mock practice runs
- Mock externals at the end of each unit of work
- Practical Test: Summative or Formative practical tests.
- Mid-Year Examinations
- Preliminary Examinations

Looking Ahead:

- Level 3 Physics ,Tertiary level study, A diverse range of careers stem from Physics - e.g. Teacher, Meteorology, Pharmacy, Electrical, Electronic, Engineering, Pilot etc

Course Description

Course aims:

This course is aimed at those students who have achieved well in Year 11 and who know that they wish to pursue a career that requires Physics. Such careers include engineering, Electronics, Electrical, Meteorology and much more. The course consists of Achievement Standards from the Level 2 Physics course.

Course learning outcomes:

- To be able to take measurements of physical quantities and analyse data graphically to determine a relationship.
- To be able to describe and explain wave phenomenon and use formulae to calculate characteristic of waves
- To be able to describe and explain the behaviour of light in reflection, refraction and interference and use formulae to calculate quantities associated with the reflection and refraction of light
- To be able to describe and explain accelerated, projectile, relative and circular motion and use formulae to calculate quantities associated with above.
- To be able to describe and explain the effects of forces and momentum and use formulae to calculate quantities associated with force and momentum.
- To describe and explain the effects of energy transformation and conservation and calculate energy.
- To describe and explain effects of electric fields and direct current electricity in series and parallel circuits and use formulae to calculate electrical quantities associated with electric fields and dc circuits.
- To describe and explain electromagnetic phenomena and use formulae to calculate electromagnetic quantities.
- To describe and explain the structure of the atom and radioactivity.
- To describe and explain physics phenomena in unfamiliar contexts use formulae to calculate physical quantities in unfamiliar contexts.
- Explain the models of the atom
- Explain the properties of the nuclear radiations and calculate the energy in fusion and fission.

2022 Course Assessment Statement – Y12 PHYSICS (PHY201)

HOW WILL I BE ASSESSED IN THIS SUBJECT?

Achievement Standard	Curriculum Level	Level and Credit Value	Internal or External Assessment	Brief Description	My Prelim Grades	My Final Grades for Internals
AS91168 (AS 2.1) Carry out a practical physics investigation that leads to a non-linear mathematical relationship.	7	Level 2 4 credits	I	Carrying out a practical physics investigation which leads to non-linear relationship.		
AS91169 (AS 2.2) Demonstrate understanding of Physics relevant to a context	7	Level 2 3 credits	I	Research task which allows students to look at application of Physics concepts and ideas to a context.		
AS91171 (AS 2.4) Demonstrate understanding of mechanics	7	Level 2 6 credits	E	Motion, kinematics, projectiles, circular motion, force, acceleration, momentum, energy		
AS91172 (AS 2.5) Demonstrate understanding of atomic and nuclear physics	7	Level 2 3 credits	I	Models of the atom, nuclear transformation and products, nuclear reactions,		
AS91173 (AS 2.6) Demonstrate understanding of electricity and electromagnetism	7	Level 2 6 credits	E	Concepts related to Static electricity, DC Circuits and Electromagnetism		

De La Salle College – Physics PHY201 - Year Planner 2022

Subject: 12 Physics

Teacher in charge: Mr. Ajinesh Kumar

Year Level: 12

Curriculum Levels: 7

<p>Unit Title: AS91168 (AS 2.1) Physics Internal – Carry out a practical physics investigation that leads to a non-linear mathematical relationship</p> <p>Achievement objectives:</p> <ul style="list-style-type: none"> Develop a procedure to gather data Demonstrate procedure in processing data Be able to interpret data. <p>Learning outcomes/skills:</p> <ul style="list-style-type: none"> Able to carry out an investigation to collect data between two variables Draw graphs of two variables State the type of relationship between two variables <p>Assessment tasks/method:</p> <ul style="list-style-type: none"> Correct use of a measurement skills to determine accurate values Plotting points accurately to get a graph. Stating the relationship between graphs <p>Key competencies: Thinking, Managing self, Using language, symbols, and texts.</p> <p>Values: Innovation, inquiry and curiosity, excellence</p> <p>Approximate time required: 4 weeks</p>	<p>Unit Title: AS91170 (AS2.2 Physics) Internal – Demonstrate understanding of Physics relevant to a selected context.</p> <p>Achievement objectives:</p> <ul style="list-style-type: none"> Demonstrate understanding of principles of Motion constant acceleration in a straight line; free fall under gravity, projectile motion; circular motion. Be able to resolve Force components, vector addition of forces, unbalanced force and acceleration, equilibrium (balanced forces and torques), and explain centripetal force, force and extension of a spring. Develop an understanding of momentum and energy issues in collisions <p>Learning outcomes/skills:</p> <ul style="list-style-type: none"> To be able to describe and explain relate physics principles to a selected context. <p>Assessment tasks/method:</p> <p>Written report</p> <p>Key competencies: Thinking, Managing self, Using language, symbols, and texts, Participating and contributing.</p> <p>Values: Inquiry and curiosity, excellence, respect.</p> <p>Approximate time required: 5 weeks</p>	<p>Unit Title: AS91170 (AS2.3 Physics) External – Demonstrate understanding of waves</p> <p>Achievement objectives:</p> <ul style="list-style-type: none"> Demonstrate qualitative and quantitative understanding of Physics of Light (ie reflection in curved mirrors, refraction through lenses, refraction, total internal reflection and critical angle at a plane boundary). Be able to explain and solve problems on Reflection and refraction of waves at a plane boundary including phase and wave parameter changes if applicable, superposition of pulses, diffraction, 2-point source interference (qualitative), <p>Learning outcomes/skills:</p> <ul style="list-style-type: none"> To be able to describe and explain concepts and solve problems based on Light and Waves. <p>Assessment tasks/method:</p> <ul style="list-style-type: none"> Mid Year Mock Examinations (Term 2). Preliminary Mock Examinations (Term 3). External NCEA examination at year's end. <p>Key competencies: Thinking, Managing self, Using language, symbols, and texts, Participating and contributing.</p> <p>Values: Inquiry and curiosity, excellence, respect.</p> <p>Approximate time required: 6 weeks</p>
---	---	---

<p>Unit Title: AS91171 (AS2.4 Physics) External – Demonstrate understanding of mechanics</p> <p>Achievement objectives:</p> <ul style="list-style-type: none"> • Demonstrate understanding of principles of Motion constant acceleration in a straight line; free fall under gravity, projectile motion; circular motion. • Be able to resolve Force components, vector addition of forces, unbalanced force and acceleration, equilibrium (balanced forces and torques), and explain centripetal force, force and extension of a spring. • Develop an understanding of momentum and energy issues in collisions <p>Learning outcomes/skills:</p> <ul style="list-style-type: none"> • To be able to solve quantitative problems in motion, forces and momentum and explain their principles. <p>Assessment tasks/method:</p> <ul style="list-style-type: none"> • Mid Year Mock Examinations (Term 2). • Preliminary Mock Examinations (Term 3). • External NCEA examination at year's end. <p>Key competencies: Thinking, Managing self, Using language, symbols, and texts, Participating and contributing.</p> <p>Values: Inquiry and curiosity, excellence, participation</p> <p>Approximate time required: 8 weeks</p>	<p>Unit Title: AS91172 (AS 2.5 Physics) Internal – Demonstrate understanding of atomic and nuclear physics</p> <p>Achievement objectives:</p> <ul style="list-style-type: none"> • models of the atom (Thomson and Rutherford), gold foil experiment • nuclear transformations: radioactive decay (half life), fission and fusion reactions • conservation of atomic and mass number products of nuclear transformation: power generation, $E = mc^2$, $P = E/t$, properties of nuclear emissions (ionising ability, penetration ability) <p>Learning outcomes/skills:</p> <ul style="list-style-type: none"> • Should be able to demonstrate understanding of models of atoms and explain radioactivity. <p>Assessment tasks/method:</p> <ul style="list-style-type: none"> • The assessment will involve a formal one hour written test. <p>Key competencies: Thinking, Managing self, Using language, symbols, and texts, Participating and contributing.</p> <p>Values: Inquiry and curiosity, Excellence, participation and contribution</p> <p>Approximate time required: 4 -5 weeks</p>	<p>Unit Title: AS91173 (AS2.6 Physics) External – Demonstrate understanding of electricity and electromagnetism</p> <p>Achievement objectives:</p> <ul style="list-style-type: none"> • Demonstrate understanding of Static Electricity in the following strands; Uniform electric field, electric field strength, force on a charge in an electric field, electric potential energy, and work done on a charge moving in an electric field. • Develop understanding of series and parallel circuit with different circuit components. • Be able to apply knowledge of DC motor and generator to every day application <p>Learning outcomes/skills:</p> <ul style="list-style-type: none"> • To be able to explain phenomenon of static, current electricity and electromagnetism and apply knowledge to solve quantitative problems. <p>Assessment tasks/method:</p> <ul style="list-style-type: none"> • Mid Year Mock Examinations (Term 2). • Preliminary Mock Examinations (Term 3). • External NCEA examination at year's end. <p>Key competencies: Thinking, Managing self, Using language, symbols, and texts, Participating and contributing.</p> <p>Values: Inquiry and curiosity, excellence, innovation.</p> <p>Approximate time required: 8 weeks</p>

Achievement Standard

Subject Reference	Physics 2.1		
Title	Carry out a practical physics investigation that leads to a non-linear mathematical relationship		
Level	2	Credits	4
Subfield	Science	Assessment	Internal
Domain	Physics		
Status	Registered	Status date	17 November 2011
Planned review date	31 December 2020	Date version published	20 November 2014

This achievement standard involves carrying out a practical physics investigation that leads to a non-linear mathematical relationship.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<ul style="list-style-type: none"> Carry out a practical physics investigation that leads to a non-linear mathematical relationship. 	<ul style="list-style-type: none"> Carry out an in-depth practical physics investigation that leads to a non-linear mathematical relationship. 	<ul style="list-style-type: none"> Carry out a comprehensive practical physics investigation that leads to a non-linear mathematical relationship.

Explanatory Notes

- This achievement standard is derived from *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007, Level 7; and is related to the material in the *Teaching and Learning Guide for Physics*, Ministry of Education, 2010 at <http://seniorsecondary.tki.org.nz>. The standard is aligned to the achievement objectives *Physical Inquiry and Physics Concepts* in the Physical World strand and *Investigating in Science* in the Nature of Science strand.

This standard is also derived from Te Marautanga o Aotearoa. For details of Te Marautanga o Aotearoa achievement objectives to which this standard relates, see the [Papa Whakaako](#) for the relevant learning area.

- Carry out a practical physics investigation* involves:

 - collecting data relevant to the aim based on the manipulation of the independent variable over a reasonable range and number of values
 - drawing a graph that shows the relationship between the independent and dependent variables
 - writing a conclusion which describes the type of mathematical relationship that exists between the variables.

Carry out an in-depth practical physics investigation involves:

- controlling the variable(s) that could have a significant effect on the results
- using technique(s) that increase the accuracy of the measured values of the dependent (and independent, if appropriate) variable
- writing a conclusion that describes the mathematical relationship obtained from the experimental data.

Carry out a comprehensive practical physics investigation involves writing a discussion that addresses critical issues such as:

- a reason why there is a limit to either end of the value chosen for the independent variable
- a justification for why a variable needs to be controlled
- a description of any difficulties encountered when making measurements and how these difficulties were overcome
- the relationship between the findings and physics ideas
- a description of any unexpected results and a suggestion of how they could have been caused and/or the effect they had on the validity of the conclusion.

- A practical physics investigation* is an activity that includes gathering, processing and interpreting data.
- Conditions of Assessment related to this achievement standard can be found at <http://ncea.tki.org.nz/Resources-for-Internally-Assessed-Achievement-Standards>.

Replacement Information

This achievement standard replaced AS90252 and unit standard 6386.

Quality Assurance

- Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.

Consent and Moderation Requirements (CMR) reference

0233

<ul style="list-style-type: none"> Demonstrate understanding of physics relevant to a selected context. 	<ul style="list-style-type: none"> Demonstrate in-depth understanding of physics relevant to a selected context. 	<ul style="list-style-type: none"> Demonstrate comprehensive understanding of physics relevant to a selected context.

Explanatory Notes

- This achievement standard is derived from *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007, Level 7; and is related to the material in the *Teaching and Learning Guide for Physics*, Ministry of Education, 2010 at <http://seniorsecondary.tki.org.nz>. The standard is aligned to the achievement objectives *Using Physics* in the Physical World strand, and *Communicating in Science* in the Nature of Science strand.

This standard is also derived from Te Marautanga o Aotearoa. For details of Te Marautanga o Aotearoa achievement objectives to which this standard relates, see the [Papa Whakaako](#) for the relevant learning area.
- Demonstrate understanding* involves providing characteristics of, or an account of the physics related to the selected context.

Demonstrate in-depth understanding involves providing reasons as to how or why the physics applies to the selected context.

Demonstrate comprehensive understanding involves linking ideas to integrate physics relevant to the selected context, and involves elaborating, justifying, relating, evaluating, comparing and contrasting, or analysing the physics underpinning the context.

- The *selected context* must involve physics principles that are at curriculum Level 7. It may be technological or biological.
- Conditions of Assessment related to this achievement standard can be found at <http://ncea.tki.org.nz/Resources-for-Internally-Assessed-Achievement-Standards>.

Replacement Information

This achievement standard replaced AS90258.

Quality Assurance

- Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.

This standard is also derived from Te Marautanga o Aotearoa. For details of Te Marautanga o Aotearoa achievement objectives to which this standard relates, see the [Papa Whakaako](#) for the relevant learning area.

- Demonstrate understanding* involves writing statements that show an awareness of how simple facets of phenomena, concepts or principles relate to a described situation.

Demonstrate in-depth understanding involves writing statements that give reasons why phenomena, concepts or principles relate to a described situation. For mathematical solutions, the information may not be directly usable or immediately obvious.

Demonstrate comprehensive understanding involves writing statements that demonstrate understanding of connections between concepts.

- Written statements include mathematical solutions and/or descriptions. Descriptions may include graphs or diagrams.
- Assessment is limited to a selection from the following:

Motion:

- constant acceleration in a straight line
- free fall under gravity
- projectile motion
- circular motion (constant speed with one force only providing centripetal force).

Force:

- force components
- vector addition of forces
- unbalanced force and acceleration
- equilibrium (balanced forces and torques)
- centripetal force
- force and extension of a spring.

Momentum and Energy:

- momentum
- change in momentum in one dimension and impulse
- impulse and force
- conservation of momentum in one dimension
- work
- power and conservation of energy
- elastic potential energy.

Relationships:

$$v = \frac{\Delta d}{\Delta t} \quad a = \frac{\Delta v}{\Delta t}$$

$$v_f = v_i + at \quad d = v_i t + \frac{1}{2} at^2$$

$$d = \frac{v_i + v_f}{2} t \quad v_f^2 = v_i^2 + 2ad$$

$$a_c = \frac{v^2}{r}$$

$$p = mv$$

$$E_p = \frac{1}{2} kx^2$$

$$W = Fd$$

$$F = ma$$

$$\Delta p = F \Delta t$$

$$E_k = \frac{1}{2} mv^2$$

$$P = \frac{W}{t}$$

$$\tau = Fd$$

$$\Delta E_p = mg \Delta h$$

Demonstrate in-depth understanding involves writing statements that give reasons why phenomena, concepts or principles relate to a described situation. For mathematical solutions, the information may not be directly usable or immediately obvious.

Demonstrate comprehensive understanding involves writing statements that demonstrate understanding of connections between concepts.

- Written statements include mathematical solutions and/or descriptions. Descriptions may include graphs or diagrams.
- Assessment typically includes:
 - models of the atom (Thomson and Rutherford), gold foil experiment
 - nuclear transformations: radioactive decay (half life), fission and fusion reactions
 - conservation of atomic and mass number
 - products of nuclear transformation: power generation, $E = mc^2$, $P = E/t$, properties of nuclear emissions (ionising ability, penetration ability).
- Conditions of Assessment related to this achievement standard can be found at <http://ncea.tki.org.nz/Resources-for-Internally-Assessed-Achievement-Standards>.

- Demonstrate understanding* involves writing statements that show an awareness of how simple facets of phenomena, concepts or principles relate to a described situation.

Demonstrate in-depth understanding involves writing statements that give reasons why phenomena, concepts or principles relate to a described situation. For

mathematical solutions, the information may not be directly usable or immediately obvious.

Demonstrate comprehensive understanding involves writing statements that demonstrate understanding of connections between concepts.

- Written statements include mathematical solutions and/or descriptions. Descriptions may include graphs or diagrams.
- Assessment is limited to a selection from the following:

Static Electricity:

- uniform electric field
- electric field strength
- force on a charge in an electric field
- electric potential energy
- work done on a charge moving in an electric field.

DC Electricity:

- parallel circuits with resistive component(s) in series with the source
- circuit diagrams
- voltage
- current
- resistance
- energy
- power.

Electromagnetism:

- force on a current carrying conductor in a magnetic field
- force on charged particles moving in a magnetic field
- induced voltage generated across a straight conductor moving in a uniform magnetic field.

Relationships:

$$E = \frac{V}{d} \quad F = Eq \quad \Delta E_p = Eqd \quad E_k = \frac{1}{2}mv^2$$

$$F = BIL \quad F = Bqv \quad V = BvL$$

$$I = \frac{q}{t} \quad V = \frac{\Delta E}{q} \quad V = IR \quad P = IV \quad P = \frac{\Delta E}{t}$$

$$R_T = R_1 + R_2 + \dots \quad \frac{1}{R_T} = \frac{1}{R_1} + \frac{1}{R_2} + \dots$$

- Assessment Specifications for this achievement standard can be accessed through the Physics Resources page found at <http://www.nzqa.govt.nz/qualifications-standards/qualifications/ncea/ncea-subject-resources/>.

2022 PHY201 – Student Guide to Bibliographies / Referencing

A bibliography is the ‘trail’ of reading that you did to inform your thinking for your essay or assignment. A bibliography is organised alphabetically by the author’s last name.

Setting up a bibliography APA style:

Item	Reference list entries	In text citation
Book one author	Pilger, J. (2006). <i>Freedom next time</i> . London, England: Bantam.	(Pilger, 2006) or ... Pilger (2006).
Book two authors	Shaw, R., & Eichbaum, C. (2008). <i>Public policy in New Zealand: Institutions, processes and outcomes</i> . Auckland, New Zealand: Pearson Education.	(Shaw & Eichbaum, 2008) or According to Shaw and Eichbaum (2008) ...
Book three - five authors	Alred, G. J., Brusaw, C. T., & Oliu, W. E. (2009). <i>The business writer’s handbook</i> . New York, NY: St Martin’s Press.	<i>First citation:</i> (Alred, Brusaw, & Oliu, 2009) <i>Subsequent citations:</i> (Alred et al., 2009)
Book six - seven authors	Gazda, G. M., Balzer, F. J., Childers, W. C., Nealy, A. U., Phelps, R. E., & Walters, R. P. (2005). <i>Human relations development: A manual for educators</i> (7th ed.). Boston, MA: Pearson Educational.	(Gazda et al., 2005)
Website html no date	Flesch, R. (n.d.). <i>How to write plain English</i> . Retrieved April 12, 2009, from http://www.mang.canterbury.ac.nz/writing_guide/writing/flesch.shtml	(Flesch, n.d.)
Website PDF	Radio New Zealand. (2008). <i>Annual report 2007-2008</i> . Retrieved from http://static.radionz.net.nz/assets/pdf_file/0010/1796761/Radio_NZ_Annual_Report_2008.pdf	(Radio New Zealand, 2008)
